

Eric A. Joseph
IBM Research Division,
Thomas J. Watson Research Center, P.O. Box 218,
Yorktown Heights, New York 10598

ERIC A. JOSEPH is a Research Staff Member and Senior Manager of the Unit Process Technology Group within the Science and Technology Research department at the IBM T. J. Watson Research Center in Yorktown Heights, NY. He received his B.S. and M.S. degrees in Physics from the State University of New York at Albany in 1998 and 2000, respectively, and received his Ph.D. in Electrical Engineering from the University of Texas at Dallas (UTD) in 2005. He subsequently joined IBM Research where he focused on the development of patterning solutions for perovskite, chalcogenide and ferromagnetic materials for non-volatile memory applications such as RRAM, PCRAM and MRAM. From 2012 until recently, he managed the Advanced Plasma Processing Group leading research and development efforts in multiple exploratory areas ranging from patterning advanced materials and evaluating aggressive scaling of CMOS devices as well as exploring new process capabilities such as novel gas chemistries and atomic layer etching. He is an author or co-author of multiple technical papers, has over 70 patents pending, was the chair of the first AVS-PSTD Atomic Layer Etch Workshop, and is the outgoing chair of the AVS Plasma Science and Technology Division.
